

NeuroQuiz

Gamified Brain Training for Kids
Cognitive + Behavioral Development in One Platform

Team Phoenix

NeuroQuiz: Gamified Brain Training for Kids

A cognitive development platform combining IQ boosting, memory enhancement, pattern recognition, and behavioral mentoring for ages 7–12.

The Problem: Learning Gaps in the Digital Age

📱 7+ Hours on Screens Daily

Kids are consuming content passively — with little to no meaningful cognitive benefit from their screen time.

😞 Traditional Learning Lacks Engagement

Conventional educational tools offer no real-time feedback, no personalization, and no motivation to keep kids coming back.

🧩 No Integrated Solution Exists

There is no single platform that addresses both **cognitive development** and **behavioral growth** together — until now.

🧠 Behavioral Mentor Gaps

Traditional learning platforms rarely include integrated behavioral development or ongoing mentoring to help kids build focus, confidence, and healthy habits.

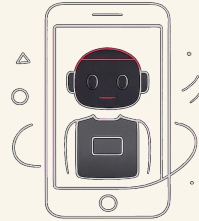

NeuroQuiz: The Solution

Gamified Challenges

IQ boost exercises, memory games, and pattern puzzles designed to grow with each child — keeping learning fun and progressive.

Brainy Chatbox

An AI-powered companion that provides real-time hints, encouragement, and guidance throughout every challenge.

Behavior Mentor

Teaches healthy habits, daily routines, and sports integration — building confidence and positive behavioral patterns beyond the screen.

Core Game Features

IQ Challenges

Logic puzzles and reasoning tasks that sharpen critical thinking.

Memory Games

Progressive difficulty levels that train and strengthen working memory.

Pattern Recognition

Visual and spatial puzzles to develop analytical thinking.

Brainy

Interactive chatbox delivering hints and real-time motivation.

Smart Dashboard: Track Every Step

24/7

Live Sync

Updated after every session

What the Dashboard Delivers

- **Real-time metrics** — performance data and learning analytics updated after every session
- **Interest mapping** — personalizes game recommendations based on each child's strengths
- **Parent & educator view** — transparent monitoring of cognitive development over time
- **Gamified rewards** — achievement badges that celebrate milestones and keep kids motivated

📄 A premium dashboard turns progress into clear next steps for every child.

Session Completion

Streak Progress

Skill Mastery

Daily Achiever

Consistent play and steady improvement

Top Strategist

Strong performance in logic and planning

Focus Champion

Reliable attention and memory gains

Behavior Mentor: Beyond Gaming

Healthy Habits

Daily routines and wellness guidance woven into the experience.

Sports Integration

Physical activity challenges that connect screen time to real-world movement.

Personalized Coaching

Tailored guidance based on each child's unique behavioral profile.

Confidence Building

Positive reinforcement that shapes lasting behavioral patterns.

Daily Sports & Fitness Challenges

NeuroQuiz encourages physical activity with fun, guided exercises that promote healthy habits and strong bodies. Learn the correct form for these daily challenges!

5 Push-ups

Keep your body straight.
Lower your chest towards the floor and push back up with control. Engage your core!

100m Run

Pump your arms, lift your knees, and land softly. Run fast and safely, focusing on your breathing!

20 Jumping Jacks

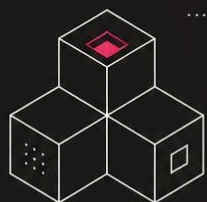

Start with feet together, hands at sides. Jump, spreading feet wide and bringing hands together overhead. Repeat with rhythm!

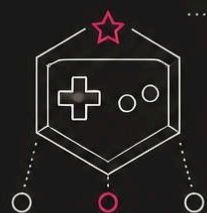

30-second Plank

Keep your core tight, back straight, and body in a direct line from head to ankles. Hold steady!

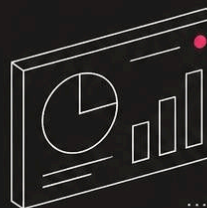

Why NeuroQuiz Wins

1. Holistic Development -
cognitive IQ training AND
behavioral mentoring in one
platform (unique in edtech)

2. Engagement -
gamification, rewards, and
Bringing Brainsy chatbox keep
kids motivated daily

3. Data-Driven -
smart dashboard gives parents
and educators actionable
insights to support each child

One Platform. Total Growth.

Most edtech tools tackle either academics *or* behavior.

NeuroQuiz is the only platform that does both — making it a uniquely powerful tool for families and schools.

By combining gamification, AI-powered mentoring, and transparent analytics, NeuroQuiz transforms passive screen time into a holistic development engine.

Cognitive + behavioral development in a single, engaging platform is our unfair advantage.
